EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Andrea G. Reister on 01/07/08.

The application has been amended as follows:

Claims 2, 20-28, 31 and 32 have been cancelled.

Claim 11, line 10, after the phrase "20°C, the phrase ", wherein the viscosity of the fluid phase of the second suspension provides injectability of the composition into the host" has been inserted.

Claim 13, line 9, after the phrase "20°C, the phrase ", wherein the viscosity of the fluid phase of the second suspension provides injectability of the composition into the host" has been inserted.

The following is an examiner's statement of reasons for allowance:

The closest prior art, Francois et al., do not teach a method comprising increasing a viscosity of an injection vehicle having a concentration of from about 175-400 mg/ml to provide injectability of the injection vehicle into a host through a needle ranging in diameter from 18-22 gauge. Contrary to the present invention, Francois et al., teach decreasing both the viscosity and concentration (page 5, lines 22-25). The

present specification defines "injectability" as performing an injection of the suspension during injection into a host freedom from clogging, and without any force or pressure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
